

# Real World Example!

# Form Validation

What is it?

# What is it?

- Listen for a form submission

# What is it?

- Listen for a form submission
- Check the fields in the form, both for required values and format of the value

# What is it?

- Listen for a form submission
- Check the fields in the form, both for required values and format of the value
- If the form is bad, tell the user why and prevent submission

# What is it?

- Listen for a form submission
- Check the fields in the form, both for required values and format of the value
- If the form is bad, tell the user why and prevent submission
- If the form is good, let the form submit

Let's Do it!
